

George Y.

AI Application Engineer

github.com/KuroGeo linkedin.com/in/george-y-2303572b2

Profile

I bring strong frontend fundamentals from high-traffic mobile and cross-platform work, and turn AI content generation, realtime voice, agent Q&A, and model workflows into usable product experiences.

Experience

ByteDance · Jun 2021 — Apr 2026

Frontend Engineer · Mobile & Web

Built frontend features for Douyin E-commerce, the shopping business inside TikTok China. I worked on core shopping and content flows, with a focus on smoother user experiences, reliable feature delivery, and faster pages.

Selected work

AI Gift Assistant

Explored a new shopping-assistant interaction that combines AI-generated product content, a virtual guide, realtime voice, and AI Agent answers.

Douyin Store Page Builder

Brought merchant-built store modules into Douyin stores, including the mobile rendering layer, a partner debugging tool, caching, and page speed improvements.

Shopping Cards in Short Videos

Improved shopping cards inside short videos, including interactions, promotion styles, coupon flows, and price animations for high-traffic pages.

Bringing commerce SaaS capabilities into multiple content apps

This work packaged product, store, and transaction capabilities as configurable, observable commerce SaaS surfaces for hosts such as Toutiao, Fanqie Novel, Xigua Video, Wukong Browser, and Dongchedi, while keeping UX and engineering boundaries consistent across content contexts.

Education

South China University of Technology · 2017–2021

B.Eng. in Electronic and Communication Engineering
